

Wooden Effect Lighting Columns

Wooden Effect Conical tapered lighting pole with optional brackets manufactured to client specification. Combine the architectural appearance of Wood with the strength and low maintenance of Steel.

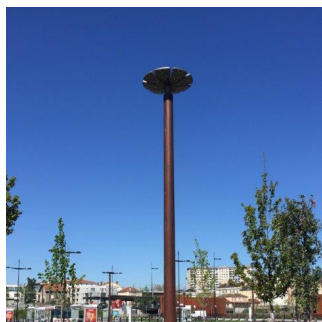

Construction: Galvanised steel construction with Flush Door (for Fuse Access). Spigot size 76mm (or 60mm on request).

Installation: Flanged as standard (Rooted on request).

Installation: Base details from Veelite. Contractor will supply fuse and internal wiring within pole.

Finish: Elm Wooden-Effect Transfer as standard. Details and other Finishes offered shown on next page.

Product Compliance: EN 40-4 and CE.

WOODEN EFFECT

ELM

KENTUCKY

PINE

WALNUT

This effect is achieved by the application of a Film transfer at 200°C onto the Metal Column. The Photos may not show the colours correctly so sample sections are available. The maximum height of a Column is 8M.

A Photo on the Front Page of this Leaflet shows an 8m Conical Column with Elm Finish.
